

Job Description

Title: Principal Systems Engineer / IT Business Analyst

Summary

We are looking for an enthusiastic and passionate individual, to join our team, based on Agrinio or Patras premises. This role will be reporting directly to company's management and the right incumbent will be responsible to drive "business digitalization" initiatives. Being hands-on responsible for IT projects and systems lifecycle, the role is intended to bridge the gap between IT and business, providing technology solutions that create value.

Role

- Collaborate with multiple company functions to understand business processes and translate their needs into detailed system/functional requirements
- Tailor business requirements to provide best fit with IT systems' functionality
- Coordinate IT projects within the company, undertaking "end to end" responsibility for their successful rollout
- Collaborate with IT vendors, defining system requirements, functional specifications and organizing deliveries/implementations
- Review deliverables, execute system and process testing, making sure they meet all required specifications
- Evangelize new technologies that create value to the business and prepare/deliver presentations to key stakeholders. Initiate digitalization projects upon management decisions.
- Train key users in IT systems and ensure their proper support
- Maintain all IT systems (hardware & software) in cooperation with vendors and safeguard their uninterrupted operation
- Responsible for 1st-2nd level support of computerized systems

Requirements

- At least 3 years experience in ERP, WMS, MES systems
- Degree in Computer Science/Engineering
- Good knowledge of SQL language
- Ability to travel (Patras - Agrinio)
- Experience in Manufacturing/Operations environment

Soft skills

- Strong analytical skills
- Problem solving skills
- Good communicator
- Self-motivated
- "Can-do" attitude

Benefits

- Competitive base salary, compared to IT market's average
- Opportunity to grow, via exposure to significant business digitalization projects, coaching and training
- Private healthcare package

About the company

IRIDA S.A. (www.irida-sa.gr) is a well-established major fish nutrition and fish advisory company based in Greece, with a maximum capacity exceeding 100.000 tons. We operate out of two modern fish feed factories. Our products extend from conventional to organic high-quality fish feeds and we serve both Greek and foreign markets.
